## Developing Safety-Critical Software

---

By Leanna Rierson

Taylor & Francis Inc, 2010. Hardcover. Book Condition: New. 15.6 x 23.5 cm. "Preface It's with a great sense of responsibility and complete humility that I present this book. After two years of researching and writing, I feel I've only scratched the surface. I hope that what I share and have experienced will help you in your professional endeavors. My passion is safety and making its realization practical. As early as high school, I wrote a column for the local newspaper on safety tips, extensively researching (as much as one can in rural America before the Internet): bathtub safety, tractor safety, and electrical safety, among others. My senior year of high school, I competed in the state persuasive speech competition--the subject was seatbelt safety. My desire to promote safety led me to the Federal Aviation Administration (FAA) and is the primary motivation behind this book. Software is only one link in the overall safety chain. Yet, it is an important link and one which grows more vital each year. As software becomes more prevalent and is used in more critical ways, its risks and contributions to safety increase. At the same time that the risk due to software is increasing,...

### Reviews

*It in one of the most popular ebook. It usually fails to price an excessive amount of. Its been printed in an extremely basic way in fact it is merely right after i finished reading through this book in which really altered me, change the way i believe.*

-- **Sigrid Brown**

*Absolutely one of the best pdf We have ever read. I really could comprehended every little thing using this written e book. I am easily could get a satisfaction of reading a written publication.*

-- **Dr. Odie Hamill**
