Rgcoles and Company, United States, 2015. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book ***** Print on Demand *****.Robin G. Coles interviews Mark Rogers about Custominzing Electrical Panels and Wiring Harnesses. Inside you ll discover these key points: - Custom panels for a sailboat can have a selector switch for the navigation lights that is fed by a single breaker. - To connect a PC to a chart plotter to a VHF radio, use something like the Blue Sea #2408 or similar terminal block with little ring terminals for each connection. - To be able to switch between US and European shore power, install two different inlets on your boat and a selector switch to reconfigure the transformer. - You know it s time to replace the wiring on your boat when you see cracked insulation; the conductors are turning green, black, or crumbling; or if the wiring has been exposed to salt water and/or the navigation lights aren t working properly. Check the wiring in the bilge pump. - Using automotive wire or, worse, housing wire, is illegal. - Make sure wires are properly terminated with crimped connectors or a proper type of Eurostyle terminal blocks. - Follow ABYC (American Boat and Yacht Council) guidelines. They are a standard-setting organization and many of their regulations closely follow national fire and electrical codes. - To prevent corrosion, spray wires with a dielectric protectant once a year when you re commissioning the boat. - Generic batteries last an average of three to four years. With premium batteries, like Rolls, plus well-regulated charging systems, the battery could last ten years or more. - A clever way to repair the rubber sleeve protector on an outboard external wiring harness is to open up a piece of split-loomed...
